

24/24 Twenty-four good deeds for the year 2024 Scouts have several Beavers. One of them is the Beaver of Good Deeds, which is obtained after performing one hundred good deeds. Other citizens now have a similar option and it's even easier. It is enough to do only 24 good deeds before the end of 2024. That's why the 24/24 event. People are not yet very used to good deeds, sometimes they are suspicious and look for some hidden intention behind the deed. It is also due to the evil activity of "scumbags" who cheated - mainly senior citizens - by offering seemingly cheap goods. If we do a good deed for others, there is even a small chance that someone will do a good deed for us again. However, this is too optimistic. But the good feeling that a person has after performing a good deed is beneficial. Albert Einstein even claimed that he saw the meaning of life in working for society. Such reciprocity can be observed in nature (see e.g. ants, bees, etc.) It is also said that a good deed is often punished. Or there is also a saying "For a beggar's goodness". However, this should not discourage us, as these are only occasional cases. The problem is whether to do good deeds also for fools. Someone - for example, Christians - does this too. However, doing good deeds for decent people should probably take precedence. It is also appropriate to observe the rules of decent behavior. I believe that the 24/24 event will help, at least partially, to overcome the current "crazy mood" here.
